Science Park, State College, Pa.

A SUBSIDIARY OF THE SINGER MANUFACTURING COMPANY

"The following publication designations and their descriptions outline the system used by HRB-Singer, Inc., to differentiate the various types of technical publications."

Project No. Serial No.

37	-	42	No letter designation is given to Interim Progress Reports.
37	-	R - 42	"R" is designated to all technical reports completing a task on a current project.
37	-	F	"F" is assigned to all Final Report designations.
53	-	M - 46	"M" designation is assigned to all equipment operation and maintenance manuals.
P	-	612	"P" is assigned to all proposals.
S	-	24	"S" describes Special Publications.

TABLE OF CONTENTS

	<u>PAGE NO.</u>
1. BOOKS	-1-
2. DOCUMENT BIBLIOGRAPHIES	-1-
3. JOURNAL ARTICLES	-1-
4. SUBJECT INDEX	-64-

INTRODUCTION

This bibliography is comprehensive, covering the period from 1959 to the present, and includes books, document bibliographies and journal articles. All entries are arranged alphabetically by author. At the end of each entry, there is indicated its source e.g. E. I. - Engineering Index; S. A. - Science Abstracts pt. 2 Electrical Engineering. These sources contain abstracts of the entries. There is a subject index at the end of the entry listings.

The following sources were used in compiling this bibliography:

1. Engineering Index 1959 - Nov. 1962
2. Science Abstracts 1959 - Oct. 1962
Pt. B Electrical Engineering

BOOKS

- Blackwell, L. A. and Kotzebue, K. L.
Semiconductor-Diodes Parametric Amplifiers. Prentice-Hall, Inc. (1961)
- Noise in Electronic Devices. London: Chapman and Hall (1961) 100 pp.
SA-V. 64 3376

DOCUMENT BIBLIOGRAPHIES

Autonetics

Microwave parametric amplifiers and related parametric devices. An annotated bibliography. Barbara Ann Bryce. 10 May 1961, 269 p. 946 ref.
AD 256,963 D12994/-/A

Wright Air Development Center

Variable reactance parametric amplifiers: a selected bibliography
3/59 Tech. Note 59-90 E. K. Shaw
AD 212,563 D8405/-/WADC
D8330/-/WADC

JOURNAL ARTICLES

1. Abel, K.
Parametric amplifiers with three signal frequencies .
Nachrichtentechnische Fachberichte V. 21, 1960, p. 45-8
EI-1961 p. 1346
2. Adams, D. K.
An Analysis of Four-Frequency Nonlinear Reactance Circuits
IRE Trans. Microwave Theory and Tech. Vol. MTT-8, No. 3, 274-83
(May 1960)
EI-1960 p. 1153
SA-V. 63 6795
3. Adler, R.
Recent Advances in Electron Beam Parametric Amplifiers. Proc. Nat.
Electronics Conf. Vol. 15, 58-64 (1959)
SA-V. 63 7875

Adler, R. see: 96, 174, 468
4. Adler, R., Hrbek, G., and Wade, G.
A Low-Noise Electron Beam Parametric Amplifier. Proc. Inst.
Radio Engrs. Vol. 46, No. 10, 1757-8 (Oct. 1958)
SA-V. 62 1646
5. Adler, R., Hrbek, G., and Wade, G.
The Quadrupole Amplifier, A Low-Noise Parametric Device. Proc.
Inst. Radio Engrs, Vol. 47, No. 10, 1713-23 (Oct. 1959)
SA-V. 63 2355

6. Adler, R., Van Slyck, W. S.
 The Electron Beam Parametric Amplifier as a Radar System Component.
 IRE Trans. Military Electronics (USA) Vol. MIL-5, No. 2, 66-71
 (April, 1961)
 EI-1961 p. 1334
 SA-V. 64 5226
7. Adler, R. and Wade, G.
 Behavior of Thermal Noise and Beam Noise in a Quadrupole Amplifier.
 Proc. Inst. Radio Engrs. (USA), Vol. 49, No. 4, 802 (April 1961)
 SA-V. 65 373
8. Aitchison, R. E.
 A Transmission Matrix Analysis of the Cavity Parametric Amplifier.
 Proc. Instn. Radio Engrs. Australia Vol. 21, No. 7, 479-80 (July 1960)
 EI-1960 p. 1155
 SA-V. 64 3270
9. Aitchison, R. E.
 Variable Capacitance Parametric Modes. Proc. Instn. Radio Engrs.
 Australia, Vol. 23, No. 2, 78-85 (Feb. 1962)
 SA-V. 65 7998
- Akhmanov, S. A. see: 10
10. Akulina, D. K., Akhmanov, S. A., Gvozdever, S. D., Gorshkov, A. S.
 and Trofimenko, I. T.
 Parametric Phenomena in Wave Systems with Long Electron Streams.
 Radio tekhnika i Elektronika (USSR) Vol. 5, No. 10, 1736-9 (Oct. 1960)
 In Russian
 SA-V. 65 1042
11. Amoss, J. W. and Rodrigue, G. P.
 A Resonant Slot Parametric Amplifier. Proc. Inst. Radio Engrs.
 (USA) Vol. 49, No. 12, 1939 (Dec. 1961)
 SA-V. 65 6971
12. Anderson, D. B., Aukland, J. C.
 Transmission-Phase Relations of Four-Frequency Parametric Devices.
 IRE-Trans. on Microwave Theory and Techniques V. MTT-9, N. 6,
 Nov. 1961, p. 491-8
 SA-V. 65 5510
 EI-1962 168
13. Anderson, D. R.; Leon, B. J.
 Analysis of Circuits Containing Variable-Capacitance Diodes. IRE
 Int. Convention Rec. V. 9, pt. 4, (Automatic Control, Circuit Theory
 Information Theory) 1961 p. 182-90
 EI-1961 p. 1344

Parametric Amplifiers and Annihilation of Ferromagnetic
Hysteresis of Orthogonal Polarization. C. R. Acad. Sci. (Paris)
Vol. 248, No. 3, 384-6 (Jan. 19, 1959) in French
SA-V. 62 7362
18. Aoki, Y.
Parametric Amplifier Utilising a Ferroelectric Substance. Mem.
Fac. Engng. Osaka City Univ (Japan) Vol. 2, 93-103, (Dec. 1960)
SA-V. 64 6895
19. Aoki, Y.
Proposed Parametric Amplifier Utilizing Ferroelectric Substance.
IRE Trans. Microwave Theory and Tech. Vol. MTT-8, No. 4, 465-6
(July 1960)
SA-V. 64 2502
20. Aron, R. and Sard, E. W.
Gain Bandwidth Relations in Negative Resistance Amplifiers. Proc.
Inst. Radio Engrs. (USA) Vol. 49, No. 1, 355-6 (Jan. 1961)
SA-V. 64 3264
21. Ashkin, A.
A Low-Noise Microwave Quadrupole Amplifier. Proc. Inst. Radio
Engrs. (USA), Vol. 49, No. 6, 1016-20 (June 1961)
EI-1961 p. 1346
SA-V. 64 6246
22. Ashkin, A.
Parametric Amplification of Space Charge Waves. J. Appl. Phys,
Vol. 29, No. 12, 1646-51 (Dec. 1958)
EI-1961 p. 1105
SA-V. 62 976

- Ashkin, A. see: 62, 160
23. Ashkin, A., Bridges, T. J., Louisell, W. H., Quate, C. F.
 Parametric Amplification of Space-Charge Waves. Proc. Instn.
 Elect. Engrs. Vol. 105, Part B, Suppl, No. 11, 649-51, (1958)
 SA-V. 62 3659
24. Ashkin, A., Bridges, T. J., Louisell, W. H., Quate, C. F.
 Parametric Electron Beam Amplifiers. IRE Wescon Convention Record
 Vol. 2, Pt. 3, 13-22 (1958)
 SA-V. 62 2988
25. Ashkin, A., Louisell, W. H., Quate, C. F.
 Fast Wave Couplers for Longitudinal Beam Parametric Amplifiers.
 J Electronics and Control Vol. 7, No. 1, 1-32 (July 1959)

SUBJECT INDEX

- Adler tubes, noise sources 279
- Analysis 346, 418, 419, 420
 - application of perturbational method 165
 - beam modulated 382
 - negative conductance ampl. 388
 - power relations 409
 - single stage linear parametric ampl. 286
 - stability and transients 230
 - using 709 computer 287
- Antennas, with parametric ampl. 145

- Bandwidth and gain, modf. Rowe expression 138
- Bibliography 330
- Broadband ampl. using ridge waveguide as capacitive posts 52
- Broad hybrid coupled 381
- Built into half-wave dipole aerial 146

- Cavity-type 223
 - analysis 8
 - coupled filter circuits, analysis 101
 - coupled filter circuits, experiments 168
 - gain, bandwidth and noise 376, 469
 - 3-f, large signal charoc. 262
 - unidirectional design 429
- Circuit conditions 457
- Circuit design 393
- Communication receivers
 - analysis and exp. study 432
 - improves tropo-scatter system 410
 - reactance tube as parametric element 127
 - sensitivity with parametric ampl. 239
- Comparison with t.w.t. for low noise recep. 473
- Cyclotron waves
 - ampl. in time & space periodic fields 386
 - amplifier 44
 - magnetic pumping 372

- D.C. pumped ampl. with 2-dimen. field struc. 28
- Degenerate amplifiers
 - degenerate & quasi degenerate mode, theory 65, 358
 - design & operation 152
 - phase angle with reg. resis., calc. 256
 - sensitivity 217
 - theory 421
 - wide-band, design & perfor. 153
 - using butterfly resonators 314
- Design, construction 177
- For Digital computing 422

 use of quartz 33
 4-terminal analysis 76, 77
 Space charge waves 22, 92, 94, 383, 408
 amplifiers 298

use in Space probe tracking 60
Square-law, diode-coupled, analysis 128
Stability disc., cavity & trav. wave types 343
Static quadrupole field, spatially varying 157
Straight reactance type in low noise pre-amp 313
Subharmonic oscillator pumped at $3\frac{1}{2}$ G c/s 412
Superegenerative ampl.
 detector 484
 operation 193, 485
 reactance 50
 spectral & amplitude-freq. charac. 148
 transfer function 124
 X-band, using varactor 51
Surface wave 68
Survey of principles 117, 254
Survey and progress review 424
Switching time of subharmonic oscillations 337
Symmetrical matrix analysis 116

Theoretical performance 303
 limitations on gain and bandwidth 266
Theory 40, 42, 181, 188, 311, 325, 365,
 426, 464, 488
with Thermoelectric refrig., to improve noise fig. 454
Time-varying network, properties of 301
Time-varying parameters, properties of 307
with 3-signal frequencies 1
Transient in two circuit ampl. 212
Transistor ampl. 288, 375
 charge storage ampl. 186
 properties 490
 resonator 483
Travelling wave tube eq., and effects of parametric pumping 93
Travelling-wave type 99
 analysis, using difference eq. 489
 broad band 199
 broadbanding synchronism 55
 use of conservation of energy & momentum 355
 coupler, longitudinal beam 163
 effect of higher harmonic components 385
 effect of upper side bands 107
 using electron beam 23
 equiv circuit, with controlled cap. 197
 gain saturation 229
 gain using nonlinear cap. 218
 integrating parts with aerial structures 95
 interaction bet. signal and idling waves 200
 iterative 36

L-band ampl, design & performance 362
 L-band ampl, using semicond. diodes 434, 435
 Low noise 132
 method of obtaining charac. 438
 noise figure 395
 noise figure, theoretical derivation 37
 parasitic effects 140
 periodically loaded transmiss lines 194
 perturbation on guided e. n. wave 406
 saturation effect 228
 series connected 282
 shock waves in nonlinear transmiss. lines 277
 solid state analog 196
 stub delay structure 413
 temporal instabilities 69
 theory 100, 321
 theory, review 444
 tuning range 210, 430
 for UHF 133
 variable dual reactance 471
 variable reactance 207
 wide band, analysis 35, 373
Tropospheric scatter communication range extension 185
Tunnel diode ampl.
 design 83
 Esaki diode as nonlinear device 109, 481
 nonreciprocal device 290
 stability criteria 56
 theory 324
Tunnel diode down converters, effect of large pump voltage 360
 using Tunnel diodes, low noise 78
Two circuit f converters & oscillators, theory 455

UHF band use of tunable, neg-resistance ampl. 48
Up convertor, tunable over 18:1 f band 398
Up convertor used as electronically tunable filters, design, theory 309, 310

Varactor diode 61
 behavior of ideal 2-frequency varactor 323
 use in C-band ampl. 255
 const. output f, theory 342
 figures of merit 403
 for gain optimization 234
 gain stability 371
 review of design of broadband single varactor ampl. 315
 theory 428

Variable capacitance ampl.
adjustments using passive circuit meas 268
analysis 13
theory 369

Variable capacitance diodes 9, 213, 416
charac. 334
four-terminal equiv. circuit 244
noise figure 272
three-terminal circuit 149
review 316

Variable parameter ampl, characteristics 192

Variable reactance, 401
operating charac. 305

V.H.F. ampl.
circuit theory, diode details 29, 30
noise performance 88
with Si diodes 283
and UHF reception 31

Wave equation with nonlinear interface solv 320

Wave prop. in network contg neg. resistance 400

Wave systems with long election streams 10
use for Weak signals, theory 143

Wide band ampl 252
converters, theory & design 265
optimum design 308

X-band ampl, large gain-bandwidth 462
